REACH Description:

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) is a European Union Commission (EUC) Regulation on chemicals and their safe use. The REACH regulations became effective on June 1, 2007 and will be phased in until 2018.

UE Responsibility to REACH Requirements

Under the structure of the REACH Regulation, United Electric Controls is a manufacturer of products considered to be “complex objects” comprised of “articles” to EU customers through entities located within the EU. We do not manufacture or supply “substances” or “preparations” and our products do not involve the “intentional release of substances”. Accordingly, we foresee no registration requirement for our products.

UE REACH Compliance

For the benefit of our customers within the EU, United Electric Controls declares that our products will not cause the exposure of humans or the environment to SVHC (substances of very high concern) substances during normal or reasonably foreseeable conditions of use or disposal and is therefore compliant with the REACH directive.

Additional REACH Information

For additional information, see Understanding Reach at web site:
<https://echa.europa.eu/regulations/reach/understanding-reach>

This website includes Questions & Answers section for “Only Representative of non-EU manufacturer”, which applies to United Electric Controls.

Sincerely,

Scott Kayhart
Certification Engineer
