The RoHS directive of the European Union has been in effect as of July 1, 2006. The directive bans entry into Europe of certain products or components based on specified limits of certain hazardous substances. Details of the directive can be found at:

http://ec.europa.eu/environment/waste/weee_index.htm

While United Electric's products generally fall within the directive's exempt Category # 9, we are committed to fully meet the requirements of this directive. We are well on our way to compliance and many of our products already meet the requirements. UE will continue with this effort and expects to have most, if not all, of our products compliant in the future.

In the interim, we ask that you contact us for details if you have a specific RoHS product requirement. You can also check the UE website <http://www.ueonline.com> for status updates on UE product RoHS compliance.

For specific UE product RoHS compliance questions or needs, please call Eric Moitoso (Certification Engineer) Ext. 1162. We look forward to answering your questions and working with you now and in the future.

Sincerely,

Eric F. Moitoso
Certification Engineer
United Electric Controls
